Street lights were turned off in March 2017.

All areas in Surrey were operating under the part time street lighting scheme by July 2017.

This means that across the whole of Surrey there were 1118 more crimes committed between midnight and 5am March to July 2017 as there were during the same period in 2016. This is a staggering increase of 22%.

This is even more staggering when compared with the same periods 2015 and 2016 which only showed an increase of 2.79% across the whole of Surrey

This data therefore proves that Surrey CC turning off street lights between midnight and 5am has caused a significant rise in crime during these times. The typical annual rise in crime between midnight and 5am across Surrey has historically been between 2% and 3%. In 2017 the rise in crime statistics for the same time period is 22%.
